DETAILED ACTION

Election/Restriction

1. Claims 19-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claimed invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 7.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 10-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 10, lines 11-12, applicant should clarify the structure and arrangement of the removable mechanical securement of the interrupter with the attached sleeve.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2832

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker [US 5,597,992] in view of WO98/11582.

Walker discloses an electrical circuit interrupter [14] mechanically secured within a housing [figure 1] mechanically connected to the housing having a sleeve [19] formed of polymeric material [column 3, line 67-column 4, line 3] extending about the circuit interrupter and past the axial length thereof.

Walker disclose the instant claimed invention except for: the polymeric sleeve being preapplied to the circuit interrupter.

WO98/11582 discloses a method of mounting circuit interrupter into a housing including the steps of applying a polymeric sleeve to the exterior of a circuit interrupter and subsequently heating the sleeve to secure the sleeve and the interrupter into the housing [claim 26 of WO98/11582].

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the method of WO98/11582 for the interrupter assembly of Walker for the purpose of securing the circuit interrupter within the housing.

The specific materials used to form the sleeve, attachment methods and shape of the sleeve would have been an obvious design consideration based on the operating environment, load currents and rating of the interrupter.

Art Unit: 2832

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
